

Skin*Bella*TM

Crystal-Free Microdermabrasion

B E Y O N D M I C R O D E R M A B R A S I O N

The Powerful Combination of Oxygen Botanicals™ and SkinBella™

Oxygen Botanicals professional products are formulated to boost SkinBella services. Oxygen Botanicals is infused with pure, non-chemically derived oxygen and green tea. This water-based skincare line works perfectly with the SkinBella wet peel method. Oxygen Botanicals products allow for customization and precise treatment of skin concerns while effectively enhancing the result of each SkinBella session.

Our wet peel method was developed by scientists to include activators as the liquid medium when exfoliating and hydrating. Our signature Exfoliant Activator includes key ingredients such as Papain Bacillus to aid in removing sebum and dead skin cells. The Super Hydrating Activator with Allantoin and Chamomile, moisturizes and soothes for radiant, supple skin. The Invigoration function is enhanced by the rejuvenating properties of our 18% L-Ascorbic Acid Vitamin C serum.

Pure oxygen and pharmaceutical grade botanical ingredients, along with a time-released advanced liposome delivery system, make Oxygen Botanicals unique and effective.

Oxygen Botanicals features a full line of retail products to increase revenue and maintain results.

- Pure, non-chemically derived oxygen
- Water-based formulas
- Pharmaceutical-grade botanicals and vitamins
- No artificial fragrances

"I'm a firm believer in the SkinBella and Oxygen Botanicals – I see results immediately! Oxygen Botanicals is the BEST product I have worked with... It's amazing!"

Jerry Johnson
Elysium Salon and Day Spa
Duluth, MN

"The SkinBella is perfect for my business. My clients also love the Oxygen Botanicals skin care I use on them, and I like how easy it is to customize a facial."

Dorothy Simmons
A Healing Touch Massage
Austwell, TX

A Technological Advancement Beyond Microdermabrasion...

SkinBella™ is a non-invasive, Italian technology utilizing an ultrasonic applicator. Unlike standard crystal microdermabrasion, diamond tip technology and other forms of exfoliation that employ abrasive mechanisms, SkinBella is extremely gentle. Four (4) piezoelectric transducers in the handpiece produce bi-elastic vibrations. The high speed mechanical oscillation at 25,000 cycles per second, combined with our Oxygen Botanicals™ liquid activators, creates controlled cavitation. This action helps to effectively and safely remove the outer layers of the stratum corneum on all skin types.

SkinBella's ultrasonic applicator offers options beyond exfoliation. The LED control panel allows the aesthetician to easily calibrate each distinct function and achieve precise settings for optimum results.

SkinBella provides immediate and visible results for luminous and healthy looking skin.

"I was initially introduced to the SkinBella at a plastic surgeon's conference. I was so impressed with its versatility and effectiveness that I recently purchased one for my new skin care practice. I am able to treat a wide range of skin conditions with one or all of the four main functions with excellent results."

Lee Bowman, Aesthetician
Santa Fe, NM

Exfoliation

Effectively removes dead skin cells, excess oil and cosmetic residue. Pores are cleared, resulting in deeply cleansed, smooth skin. SkinBella is safe enough to use even on sensitive skin types such as rosacea and active acne.

Clearing

Accumulations of pigment and minor scarring can be smoothed and evened through a series of SkinBella sessions. Oxygen Botanicals' specialized serums are applied for maximum effectiveness, resulting in luminous skin tonality.

Invigoration

Energize skin with the micro-massage of the ultrasonic applicator. Turns pale, dull complexions into radiant, glowing skin.

Moisturization

Boost hydration levels by micronizing customized activators and serums for deeper penetration. Skin is left feeling soft, supple and youthful looking.

SkinBella™

- More Than Just Exfoliation
- Effective for All Skin Types
- Proven, Immediate Results
- Easy to Use & Control
- Deeply Moisturizing
- Safe & Painless

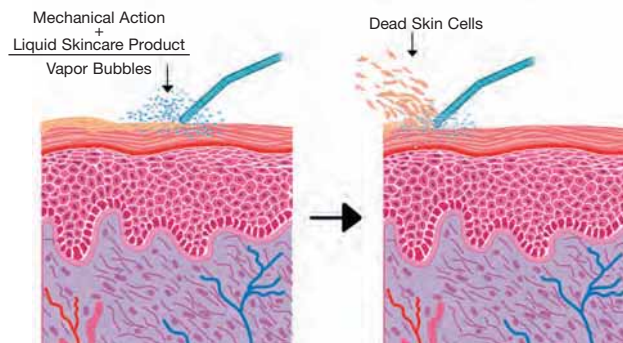

*"The SkinBella is great!
I love the ease of it,
and it is not painful
for my patients. They
can go right back to
work with polished,
refreshed skin and no
downtime."*

Lauren Cohen, M.D.
Advanced Dermatology Care Center
Newport Beach, CA

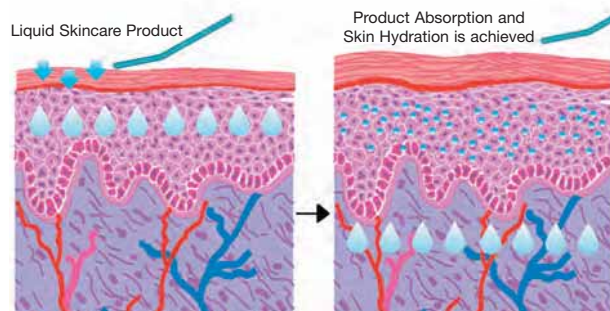

*"The SkinBella is an
incredible machine.
I use the SkinBella in
conjunction with my
laser treatments, which
produces excellent long
term results."*

Kevin Edmonds, M.D.
Camp Creek Women's Health Specialist
"Where luxury meets healthcare"

Exfoliation: Ultrasonic Applicator Tip Down

Moisturization: Ultrasonic Applicator Tip Up

SkinBella™ Advantages

SKINBELLA	MICRODERMABRASION
SkinBella does not use crystals	Microdermabrasion uses crystals or other particulates
SkinBella modalities are non-invasive and will not produce bleeding	Microdermabrasion is abrasive and can produce pinpoint bleeding
Minimal redness occurs and skin is left moisturized, hydrated and invigorated	Skin is left red, irritated and dehydrated
Power levels and technique are simple to adjust, resulting in an even exfoliation	Power levels and technique are difficult to control resulting in uneven exfoliation
SkinBella is a wet peel	Traditional microdermabrasion is a dry peel
Performs a variety of advanced skincare services in addition to exfoliation including moisturization, invigoration and clearing	Limited to exfoliation
Suitable for multiple skin types, including inflamed acne, sensitive, couperose and rosacea	Not suitable for all skin types, including inflamed acne, sensitive, couperose and rosacea
Inflamed blemishes can be exfoliated without risk of bleeding and spread of bacteria	Not recommended for inflamed acne due to risk of embedding crystals, infection and cross-contamination
Extractions are minimized and are easily performed	Extractions are not recommended, especially on deeper peels
Oxygen Botanicals™ products are used to enhance, customize and accommodate treatment	Topical products are not used during treatment and are not recommended for immediate post-treatment

Glossary of Terms:

Cavitation: The formation of a vacuum and vapor bubbles within a flowing liquid. The rapid mechanical oscillation of the ultrasonic applicator interacting with the liquid medium produces “controlled cavitation” that gently exfoliates.

High Speed Mechanical Oscillation: Micro vibrations at frequencies into the ultrasonic range (25,000 cycles per second).

Microdermabrasion: A cosmetic procedure popular in day spas, doctors’ practices and medical spas, in which the stratum corneum (dead outermost surface of the skin) is partially or completely removed by light abrasion.¹

Ultrasonic: Sometimes called “stress waves”. The conversion of electrical energy into ultrasonic mechanical energy. Frequencies of microvibrations can range from 20,000-80,000 Hz.

Ultrasonic Applicator: Four (4) piezoelectric transducers create the bi-elastic mechanical oscillation (25,000 Hz per second) in the stainless steel hand piece.
